

instructions on, and forms for, presenting a demonstration of a videodisc player as per the teachings of the present invention during an oral hearing before the Board.

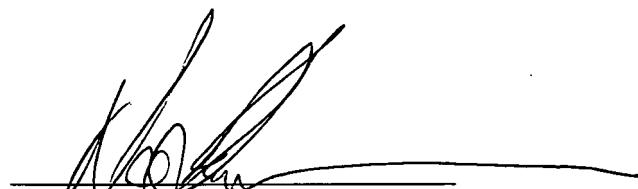

#### VI. CONCLUSION

In conclusion, the video editing system of the present invention, as recited in each of the four outstanding claims: defining, responsive to at least one preestablished content category, a plurality of segments in a video, associating, responsive to the at least one preestablished content category, a descriptor with at least one of the plurality of segments, and producing a segment map that provides for a variable arrangement of the plurality of segments, is patentably distinguished from Olivo.

Applicant respectfully submits that Olivo alone or in combination with the other previously applied references does not anticipate, and does not render obvious, the present invention as presently claimed. Therefore, the rejection of the claims under 35 U.S.C. § 102(b) as being anticipated by Olivo is unwarranted and should be reversed.

Accordingly, reconsideration and allowance of this application are earnestly solicited.

Respectfully submitted,

Max Abecassis  
Applicant
